

Medcom Bridge: Gaining the Advantage

We appreciate all of the wonderful feedback we received from those of you who expressed an interest in the rollout of our Health & Welfare Compliance platform: **Medcom Bridge**

Last week we focused on five distinct areas where the Bridge brings extraordinary value to leading employee benefit consulting firms. This week we are highlighting the first significant advantage of having the Bridge in your Health & Welfare Compliance repertoire.

Global Inventory Management System

**START
HERE**

For the first time, many leading employee benefit consulting firms have a systematic way for gauging how they stack up in relation to stated compliance goals across their entire organization. Clearly, many of our leading partners have much work to do.

**Compliance
is a moving
target**

However, when you have a user friendly system to track where you stand by producer and/or account manager, you have a line in the sand from which you may improve and grow.

Case Study: We have one employee benefit partner who has thrown down the challenge of having 100% of their clients with current WRAP Plans, POP Plans, and Form 5500 Filings within 24 months. They have made marked progress and their entire team is basking in the glory of really meeting all of the promises they made to clients at the point of sale regarding their focus on compliance.

Opportunity

Now is YOUR chance. The Bridge is available at no charge to any EB practice who refers a large amount of health & welfare compliance work to Medcom Benefit Solutions!

Next week:

How does Medcom Bridge simplify the entire Account Management process as it relates to compliance?
